

Tectyl Form 336

Metal Cold forming Fluids

| INTRODUCTION |

Tectyl Form 336 is a newly developed bolt & nut former oil. Its highly refined base oil provides mild odor and good appearance as well as extremely less fuming which enables excellent atmosphere of shop area.

The extreme pressure additive package and refined oil incorporated into Tectyl Form 336 causes no stain and rust to the forming parts.

Tectyl Form 336 gives excellent lubrication when operating medium and large sized bolt former.

| FEATURES |

- Quite less fuming and applicable even in winter season
- Excellent oxidative stability and long sump life
- Improved surface finish and no scratching
- Excellent machining capability
- Improved forming performance

| APPLICATION |

Tectyl Form 336 is a cold forging oil designed especially for use in medium & large sized bolt former.

- Material : General Steel, Alloy Steel, Stainless Steel

| PHYSICAL PROPERTIES |

Appearance	Red brown
Specific gravity (15/4°C)	0.94
Viscosity (40°C, cSt)	95
Flashing point (°C)	272
Corrosion Test	1a

- All data given in this Product Data Sheet are typical of this Product. It does not however constitute a specification. And, We reserve the right to modify products without prior notice.

| PACKAGING & SAFETY |

- Tank/Lorry, Tote, Drum(200LT), Pail(20LT)
- For your Safety, Refer to the Material Safety Data Sheet,
