

HYDRANSAFE HFDU

Biodegradable and fire-resistant hydraulic fluid

HYDRANSAFE HFDU is a new-generation hydraulic fluid

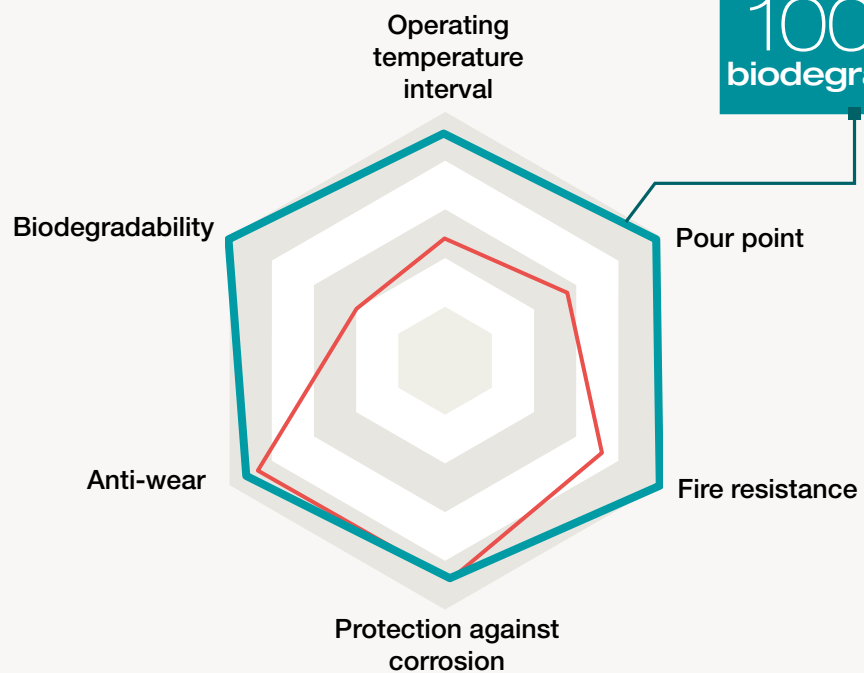

specially designed for applications where there are fire hazards and risks of environmental contamination.

CUSTOMER BENEFITS

- > 100% biodegradable in compliance with OCDE 301B
- > Equipments protection
- > Miscibility with mineral oils
- > High fire resistance

OPTIMAL PERFORMANCE

◆ HYDRANSAFE HFDU
◆ Standard hydraulic oil (HM 46)

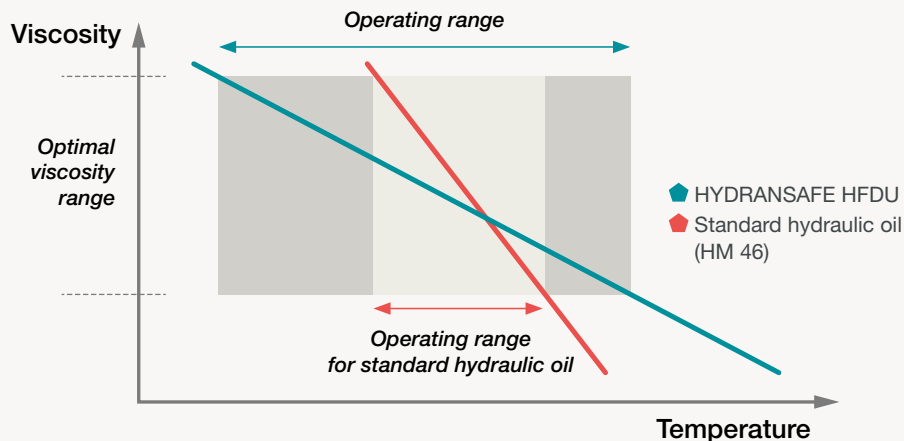

TOTAL

OPTIMAL USAGE RANGE

> Viscosity variation with temperature

✓ STANDARDS AND SPECIFICATIONS:

- FACTORY MUTUAL
- ISO 6743/4 - HFDU
- ISO 12922

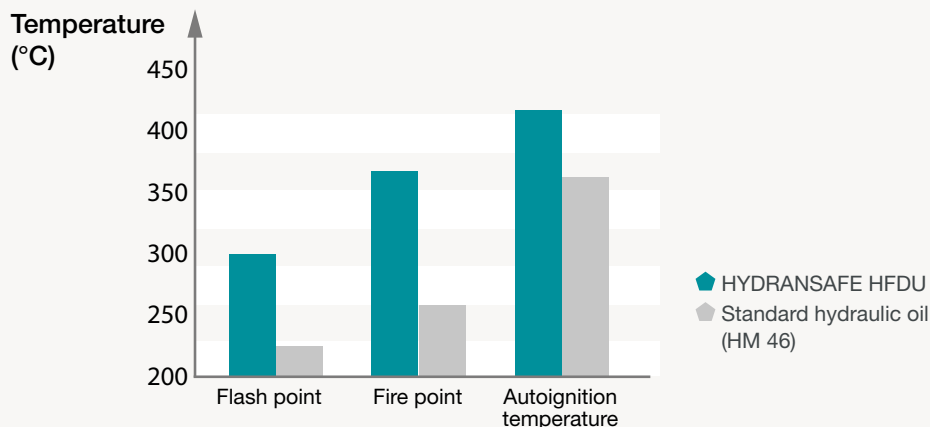

“**HYDRANSAFE HFDU** is recommended for hydraulic equipment operating in locations subject to fire hazards. As this fluid is entirely biodegradable, it is particularly well adapted for use in situations where there is a risk of contaminating the environment.”

Pascal,
product engineer

> **HYDRANSAFE HFDU** is specifically formulated to offer an extended operating temperature range. The oil’s cold and hot performance enable it to be used in a wide variety of applications.

EQUIPMENTS PROTECTION

> Fire resistance

> **HYDRANSAFE HFDU** is a synthetic biodegradable oil with high fire resistance, offering optimal protection for equipments.

HYDRANSAFE HFDU is biodegradable. This oil was developed to provide our clients with a product that helps them reduce their environmental footprint.

HYDRANSAFE HFDU is FACTORY MUTUAL certified, offering clients a recognized guarantee of fire resistance.
